

Project Executable Files

Date	06 July 2026
Project Title	Rising Waters
Maximum Marks	3 Marks

Step 1 : Submission Checklist

S.No	Item to subset	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / dependency file	Yes
4	Database schema / seed files (if applicable)	NA (Excel dataset used instead of a database)
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable)	NA (Not applicable for a Flask web application)
8	Docker file / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough	Yes

Step 2 : File / Folder Structure

```

Rising-Waters/
├── app.py
├── train_model.py
├── predict.py
├── requirements.txt
├── README.md
├── floods.save
├── transform.save
├── dataset/
│   └── flood_dataset.xlsx
├── templates/
│   ├── home.html
│   ├── index.html
│   ├── chance.html
│   └── no_chance.html
├── static/
│   ├── main.css
│   └── main.js
└── model/
    └── Trained ML Model Files
  
```

Step 3 : Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://flood-prediction-system-xe3v.onrender.com
Login Credentials (Demo)	NA (No login required)
Platform / Hosting Provider	Render
Repository Link	https://github.com/jyothsnarayavarapu494-debug/RISING-WATER.git
Demo Video Link	https://drive.google.com/drive/folders/1B5XSXT-2BUqHcIJ1G8zdO1BpXhIv-E1?usp=sharing

Step 4 : Run Instructions

Pre-requisites :

- ☐ Python 3.12+
- ☐ Flask
- ☐ Pandas
- ☐ NumPy
- ☐ Scikit-learn
- ☐ Joblib **Steps :**

- ☐ Clone the GitHub repository.
- ☐ Open the project folder. ☐ Install dependencies: `pip install -r requirements.txt`
- ☐ Run the application: `python app.py`
- ☐ Open the browser and visit:

`http://127.0.0.1:5000`
- ☐ Enter the required flood prediction values and click Predict.

Step 5 : Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / status
1	Uses historical dataset only	Future enhancement: integrate live weather API
2	Prediction accuracy depends on dataset quality	Improve by training with larger datasets
3	No SMS/Email alert feature	Planned for future implementation
